

United Sight™ is comprised of a group of **independent eye banks** serving the underserved. United Sight members **work together** to fulfill all surgical requests by sharing and distributing ocular tissue.

United Sight members are located across the US and distribute tissue both nationally and internationally.

At the core of United Sight is the collaborative vision of learning. This is the **cohesive force** that keeps the group strong. Sharing what each eye bank is doing to **help others in need** in turn helps each member contribute more of themselves to providing the **Gift of Sight.**

Working cohesively as a group today will benefit thousands of patients tomorrow and for many years to come.
